## Summary

---

CS student at SF State specializing in AI. I didn't grow up with much access to technology — but that's exactly what pushed me to pursue it. I've built AI applications, worked with LLMs, and shipped full-stack projects on my own. I'm currently diving into deep learning and excited about where it's taking me. I'm looking for an internship or fellowship where I can do real work, learn from strong mentors, and keep growing as an engineer.

## Projects

---

[AI Major Recommendation](#) | Python, OpenAI API [[Live Demo](#)] | [[GitHub](#)]

Built an AI application that leverages LLMs (OpenAI API) to recommend university majors from a student's interests and aptitudes. Iteratively evaluated and tuned the recommendation engine to improve the accuracy and relevance of its suggestions.

[SocialBlog](#) | Python, Flask, SQLAlchemy, Bootstrap 5, SQLite | [[GitHub](#)]

Implemented secure authentication, password hashing, role-based access, pagination, and database models using Flask-Login, Werkzeug, SQLAlchemy, and Flask-Migrate

[Personal Website](#) | HTML/CSS, Python [[Link](#)]

Designed and maintained a personal website showcasing data-structure explanations and algorithm solutions with clean, responsive layouts.

## Experience

---

### FlyRank.ai

#### Machine Learning Intern

Jul 2026 – Present

- At FlyRank.ai, I'm gaining hands-on experience with the machine learning process, including problem framing, data analysis, model development, and validation. I'm learning how to build reliable projects and clearly communicate what the results mean.

### College of Marin | Kentfield, CA

#### Student Ambassador

Jun 2024 – May 2026

- Led outreach initiatives that encouraged students from underrepresented communities to pursue Computer Science.
- Founded and ran a peer-mentoring program pairing current CS students with prospective students to support their transition into the major.

## Education

---

### San Francisco State University | San Francisco, CA

#### Bachelor of Science in Computer Science

August 2026

### College of Marin | Kentfield, CA

#### Associate of Science in Computer Science

Jan 2023 – May 2026

Coursework: Assembly Language, Calculus III, Discrete Math, Linear Algebra, Differential Equations, Statistics, Data Structures & Algorithms, Advanced C++.

Activities: Active member of the Computer Science Club and Math Club.

## Skills

---

**Programming Languages:** C++, Python, Java, HTML, CSS

**Tools & Frameworks:** Flask, SQLAlchemy, SQL, Git, GitHub, REST APIs, Bootstrap, OpenAI API

**Mathematics:** Linear Algebra, Differential Equations, Statistics, Multivariable Calculus

**Concepts:** Data Structures, Algorithms, Problem Solving

## Certification

---

**Flask for Python (Udemy, 2024)** — Built a full social-network app with authentication, blueprints, and SQL.

**Intro to Front-End Development (Coursera, 2023)** — HTML, CSS, and UI frameworks for modern web design.
